

AI Resumes That Land Interviews

*LILO's 15-minute AI workflow to land interviews in
30 days*

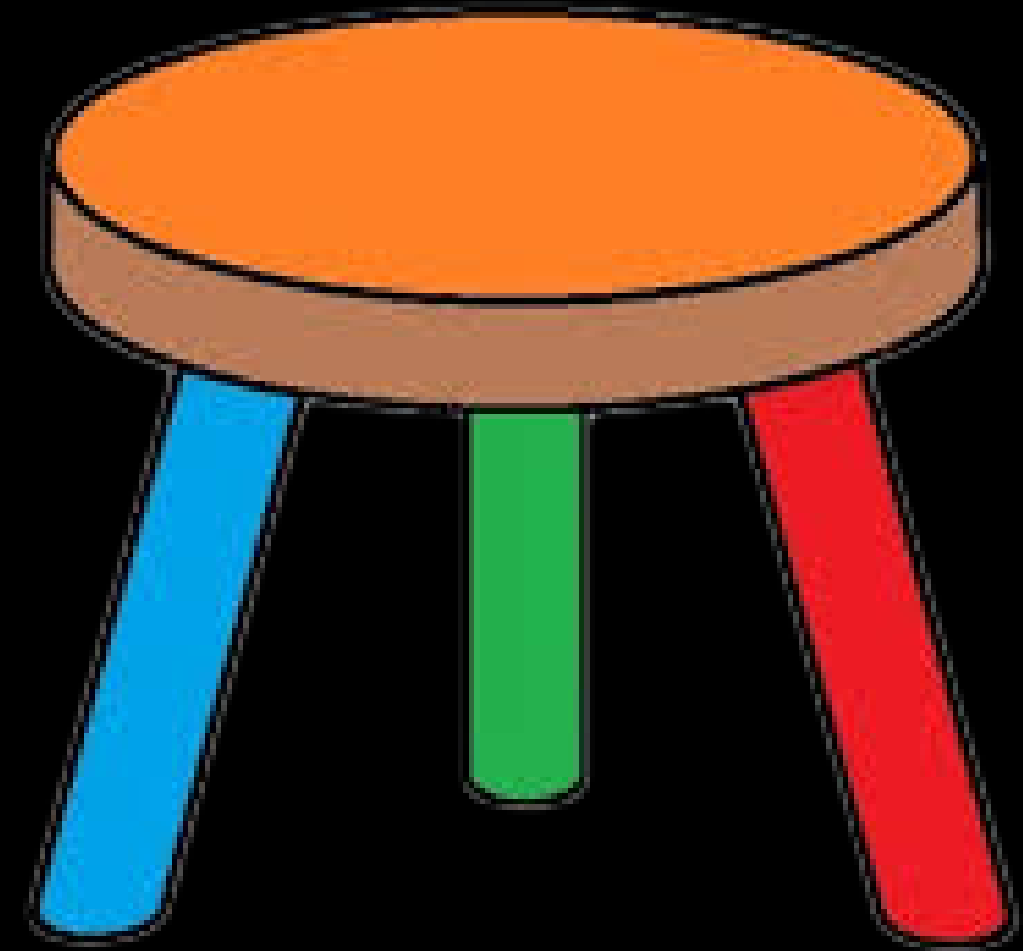

About Me

- SWE on Microsoft's Edge Web Platform Media team
- CEO & Co-Founder of LILO
- Building the code execution platform for early-career devs breaking into SWE.

The 3 legs of landing any role

- If you had these 3:
 - High-Signal Resume
 - Strong Fundamentals skills
 - High-Quality Interview Performance

Why AI Resume Tailoring Fails

- Your Prompt wasn't specific enough:
 - Fabricated metrics
 - Resume doesn't match JD
 - Generic, vague outputs
- Blind Iteration: You're not tracking what's working and what isn't.
- Application Speed: The longer you wait, the lower your chances.

The LILO Resume Workflow

- **Step 1:** Extract the role requirements
- **Step 2:** Match requirements to experience
- **Step 3:** Rewrite experience with constraints
- **Step 4:** Quality Check

LILO Resume Tailor GPT

LILO Resume Cookbook

Workflow Overview

- **Step 1:** Paste Job Description
 - LiLO Resume Tailor will extract the requirements including: must-haves, nice-to-haves, skills, and responsibilities.

Workflow Overview

- **Step 2:** Choose ONE experience to tailor
 - Paste the following: Role title, Bullet points you currently have, and any helpful notes
 - Notes can be metrics, impact summaries, or even performance reviews

Workflow Overview

- **Step 3:** Answer 6 targeted questions
 - LILO Resume Tailor will uncover ownership, metrics, responsibilities, impact and scope.

Workflow Overview

- **Step 4:** Rewrite the bullets

Workflow Overview

- **Step 5:** Quality check the output
 - Context Check: Is the situation clear?
 - Metrics Check: Is the result measurable?
 - Clarity: Are there filler words or vague wording present?
